

case study: Wimmera Mallee Pipeline

project: Wimmera Mallee Pipeline

client: Iplex/Grampians Wimmera Water

location: Victoria

product: Flowtite GRP Pipe (Continuous Filament Wound)

manufacture & supply: 46kms of DN450, PN16, 6mtr & 12mtr lengths

value: \$5—\$10m

year of project: 2008

description: This pipeline formed part of a large scale project to pipe water for irrigation purposes which has generally flowed through open channel systems. Piping the water saves a large percentage of water from evaporation and soil seepage, therefore efficiently utilising the water from its source to the irrigators.
